## Claim Objections

Claim 54 is objected to because of the following informalities: three lines from the bottom of page 3, "lest" should be --least--.

Claim 63 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim, or amend it to place it in proper dependent form. The omitting of an element which has been previously claimed is improper. Furthermore, the element being omitted is an important part of the invention as discussed in the specification and remarks.

## Allowable Subject Matter

Claims 54, 55, 57-62 and 65 would be allowable. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

The following is an examiner's statement of reasons for allowance: While the references of the prior art individually teach all the features of the claims, their combination would not have been motivated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably Application/Control Number: 10/510,375 Page 3
